- Shisha and hookah smoking

General Carbon Industry History

Established on 6th of July 2004, General Carbon Industry has vision to become a coconut charcoal briquette company with premium quality, sustainable growth, through the excellence, professionalism, employees, society and environmental caring.

In order to carry out the vision, we focus on maintaining the quality premium through consistent quality control, selective raw material while considering health, safety employees and environment.

Since 2012 we finally decided to produce briquette for shisha or hookah smoking from previously instant light BBQ briquette and activated carbon. We have been exporting some brands of shisha briquette to some countries like Jordan, USA, Russia, Lebanon, Turkey, Denmark and those brands and customers keep existing until now with developed shapes and size.

Customer Focused Strategy

With technology and qualified experts that we have in our company, we can produce high quality briquette and we always ready to respond our customers 's feed back to make sure that our products can satisfy their needs.

PT. General Carbon Industry thank our customers for their trust and and support. We promise to give more good services and good quality products to them.

Company Location

PT. General Carbon Industry is one of many industries located in Batam, Indonesia. As its location is in Batam, it becomes easier to visit us due to the position is nearest to Singapore.

Indonesia, Archipelagic State

Why Choose US?

Indonesia is the Archipelagic state that has big and small islands in a great quantity by thousands hectare plantation of coconut grows and ready to use.

One of the regions in Indonesia that its coconut plantation is very wide is Kepulauan Riau (Kepri) Province, as the nearest province to Singapore.

Besides Kepri, other provinces in Indonesia also have such these coconut plantation. That's why we have no anxiety of loosing and lacking coconut shell as our raw material.

Batam Island, Kepri - Indonesia

Batam Island, which is in Kepri, Indonesia, is an island which is adjacent to Singapore. It possibly makes an access to other countries from Singapore easier than other places in Indonesia, so Batam by Indonesia government is legalized as Free Trade Zone Area that of course gives benefits to all executive to and from Indonesia,. Due to its geographical location which is adjacent to Singapore, all the export and import management such as Document Process and Customs Clearance are conducted in Singapore even though Batam is in Indonesia authority.

As a company that is located in Free Trade Zone, **General Carbon Industry, PT** experienced some benefits as stated in previous. It supports by Singapore condition as a Trade Channel Centre in which the shipping line to numerous country are easily found. Thus, our company, **General Carbon Industry, PT**, can automatically link into many countries; especially in fulfill our customers' requests.
